LANGUAGES AND TECHNOLOGIES

Languages and frameworks: JavaScript, TypeScript, React, React Router, Remix, Tanstack Query and Table, NodeJS, Express, AstroJS, HTML, CSS, Tailwind, Python, FastAPI

Technologies and tools: Git, GitHub, Docker, Podman, Vite, Pixi, Conda, ESLint, Prettier, Vitest, Playwright, React Testing Library, Mock Service Worker, Visual Studio Code IDE, Figma

SELECT EXPERIENCE

Software Engineer II June 2025 – Present; **2 years**
Scientific Computing Associate Dec 2023 – May 2025
Howard Hughes Medical Institute (HHMI) Ashburn, VA

- Design, develop, and deploy web apps that meet the business needs of scientist users.
- Led the design and development of a [website](#) to showcase HHMI software, utilizing React and AstroJS. Automated contribution linting and deployment with a GitHub actions CI/CD pipeline, reducing the number of PRs requiring maintainer intervention by 20%.
- Built a web app allowing researchers to submit images for machine learning (ML) analysis on the client or server, utilizing Remix for the interface, FastAPI for the backend, and Docker for containerization. Improved UX by storing the ML model in IndexedDB for future page visits, reducing latency by 95%.
- Collaborate with a team of engineers to build an internal [file sharing app](#) as the primary frontend engineer, working with React Router and Typescript. Contribute to building out the FastAPI backend. The app is used by dozens of researchers and receives positive feedback for making it easier to share and view large scientific imaging data files.

Front End Developer (Volunteer) Aug – Nov 2023; **4 months**
Hack for LA Remote

- Collaborated with a remote, multi-functional team to maintain a nonprofit website.
- Recognized by team lead for fostering a supportive environment through constructive feedback on PRs.

Program Manager, Evaluation 2021 – 2023, **4 years**
AAAS Science & Technology Policy Fellow 2019 – 2021
U.S. Department of Energy Washington, DC

- Managed evaluation and outreach activities for 4 internship and fellowship programs.
- Conducted 10 user listening sessions with 58 program participants to identify UX barriers and opportunities for program websites and the online application portal.
- Collaborated with software developers to enhance webpage navigation and streamline application questions, improving the application submission experience for about ~2,500 annual applicants.

Lecturer; Instructor of Record 2014 -2018, **4 years**
Cornell University Ithaca, NY

- Taught an online course to 987 students and supervised 99 teaching assistants over 8 semesters.
- Collaborated with the Center for Teaching Innovation to measure and improve learning outcomes; published 1 peer-reviewed article on evidence-based changes made to the course delivery.

EDUCATION

Cornell University **2011 and 2017**
BS and PhD, Biological and Environmental Engineering Ithaca, NY
